BALLOON HERO

Introducing New Balloon Hero Sidekick. Just 2.6 Pounds. And Only \$235.

Now there's a lightweight, 12-volt version of the Balloon Hero cordless inflator. It's called the "Sidekick". And no balloon artist should be without one. Weighing in at only 2.6 pounds, this is the ideal pump for anyone who needs reliable, ultra-compact inflation for animal balloons. Shoulder strap and convenient, push-button operation make this an ideal strolling pump.

Designed by the inventor of Balloon Buoy, new Sidekick puts enough inflation power on your side to handle hundreds of balloons per charge. It has also been engineered to be easy on your budget. In fact, at \$235, this cordless inflator costs about the same as original Balloon Buoy

did back in 1998. Order 12v Sidekick now for just \$235. Or choose 24v Balloon Hero for \$309. Visit www.balloonhero.com.

Important Sidekick Advantages

- Very light weight—only 2.6 pounds.
- 12-volt Black and Decker Battery with charger.
- Nozzle attaches quickly and easily to 260 balloons. 160 adaptor included FREE.
- Handy black bag features shoulder strap.
- Much easier than using lungs or hand pumps!
- Festive, crowd-pleasing sound.
